Dear Mr. Weisberg -

You no doubt are up on these developments. There have been several contradictory articles along these same lines, in the last several days. So just to let you know I'm still with you, in thought & deed. I took this excuse to keep our lines open.

I am glad to see you have taken a stand as a writer & a fine person against the mad. I was not surprised however as your taking any other stand wouldn't make much sense.

As the days, weeks & months go on - I am becoming convinced beyond reasonable doubt of a strong connection between the murder of our President

2/ U The murder of millions of the wrong type - color, status & station The dreadful ingeneral & The war (wipe → thousands) on Vietnam Today in particular.

I feel The only reason we didn't kill more was because we needed strong backs - ie: cheap labor - The's are no longer need - So - we low - will - men and? The underdog will fight this time - & "Right" will not be "Right" - even figuratively speaking - & no one will (even) be around to say "I told you so."

If they will start a war to stop Garrison - one man - how can he win - we win - anybody win?

Best Wishes

As Ever

P.S.

I have just finished Sylvia Meagher's Kane book - she has really whetted my appetite for her Index of the (26) Vol's & for the (26) Vol's themselves. Fred almost got same for my Birthday. But, at the last minute we needed the money for Godly for something else. It really shook me up - as I'm so afraid - they are so out of print before I can get them. Maybe someone bought some up & is holding them - just in case they are again the great! demand & short supply?

Sincerely
Lois Saffold
